

OILWIND Longlinesystem Coiler-Washer-Racking

TYPE 23-12

- The unit is hydraulic driven and the sheaves are mounted on a gear with a hydraulic motor.
- All parts are made of stainless steel and plastic. The sheaves are made of cast iron.
- The winch is equipped with two rotating brushes that keeps the hooks and line in a clean condition.
- The winch is also equipped with a coiler and a racking system that makes sure the hooks are properly stored into the magazines.
- Operating the system is easy and maintenance is very low.

Data:

Type: 23-12

Pull/Speed on sheaves: ..	900kg /50 m. per min.
Hydraulic pressure:	200 bar
Hydraulic flow:	35 liter per min.
Water required:.....	30 liter per min.

Weight: approx. 200kg
